

AbstractCamera

```
classDiagram
    class AbstractCamera
    class CameraFlightSimulator
    class CameraFPS
    CameraFlightSimulator --|> AbstractCamera
    CameraFPS --|> AbstractCamera
```

The diagram illustrates a class hierarchy. At the top is the 'AbstractCamera' class. Below it are two subclasses: 'CameraFlightSimulator' on the left and 'CameraFPS' on the right. A horizontal line connects the two subclasses, with an upward-pointing arrow from the center of this line to the 'AbstractCamera' class, indicating that both subclasses inherit from the abstract class.
